

Empatica Health Monitoring Platform

FOR ACADEMIC RESEARCH

A full-stack solution for all your physiological data collection needs. Monitor multiple health parameters continuously and automatically with medical-grade technology.

FDA-CLEARED CE CERTIFIED

embracePLUS

SENSORS

Empower your research with the world's smallest and most advanced wearable to combine 4 powerful sensors.

-  **PPG**
4 CHANNELS (64 HZ SAMPLING RATE)
-  **EDA**
0.01 μ SIEMENS – 1 μ SIEMENS (4 HZ SAMPLING RATE)
-  **SKIN TEMPERATURE**
(1 HZ SAMPLING RATE)
-  **ACCELEROMETER**
HIGH PRECISION 3D MICROELECTROMECHANICAL ACCELEROMETER (64 HZ SAMPLING RATE)

FEATURES

EmbracePlus comes with a range of added features that ensure minimal disruption, continuous connectivity, and unparalleled flexibility.

- Bluetooth 5.0
- Compatible with most smartphones (iOS & Android)
- Vibration motor for haptic feedback
- IP67 waterproofing

- Always-on E Ink display

Data

DIGITAL BIOMARKERS

Digital biomarkers are 1-minute physiological parameters calculated by Empatica's proprietary algorithms. Available in CSV format.

- Pulse Rate
- Pulse Rate Variability
- Respiratory Rate
- Wearing Detection
- Electrodermal Activity
- Skin Temperature
- METs
- Body Position
- Sleep Detection
- Step Count
- Activity Count
- Actigraphy Count
- Activity Intensity
- Activity Classification
- Acticounts
- Accelerometer Magnitude Standard Deviation

RAW SENSOR DATA

High frequency raw data. Available in Avro format.

- Accelerometer
- Skin Temperature
- Electrodermal Activity
- Blood Volume Pulse
- Systolic Peaks
- User Tags
- Steps

All data is stored on the GDPR and HIPAA-compliant Empatica Cloud and accessible via an Amazon S3 bucket. **Request sample data.**
